## Monsoon Watch

Monsoon has covered MP, Uttarakhand and J&K

It has progressed further into UP, Rajasthan, Punjab & HP

Conditions are becoming favourable for the advance of monsoon winds into Delhi & Chandigarh

Likelihood of La Nina increases, which is favourable for the monsoon season

Monsoon rainfall has been 22% above normal since June 1

CURRENT WEATHER & FORECAST

Widespread heavy rainfall expected to continue over east India

South India is likely to see some showers in the coming days

Heavy rainfall continues over central India

Thunderstorms observed in Delhi, UP and Haryana

At 43.5° C, yesterday's hottest place in India was again Ganganagar in Rajasthan

## Short Takes

### Gadkari Launches MSME Distressed Asset Fund

NEW DELHI Union minister Nitin Gadkari on Wednesday launched the distressed asset fund for micro, small and medium enterprises (MSMEs), which provides for ₹20,000 crore as guarantee cover to stressed businesses. The scheme seeks to extend support to the promoter(s) of operational MSMEs that are stressed and have become non-performing assets as on April 30, 2020. Around 200,000 MSMEs are expected to benefit, as per a government estimate. The fund was unveiled last month as part of the government's 'Atmanirbhar' package for the MSME sector. After completion of formalities including approval of CCEA and consultation with the finmin, SIDBI and RBI, the scheme was launched on Wednesday. Promoters of MSMEs availing this scheme will be given credit equal to 15% of their stake (equity plus debt) or ₹75 lakh, whichever is lower, which is to be infused as equity. – Our Bureau

### Independent Directors Can Register Online Till Sept 30

NEW DELHI The ministry of corporate affairs has extended the deadline for existing independent directors to register on its online databank by three months to September 30, according to a notification on Wednesday. The ministry has also allowed companies to hold board meetings through videoconference or other audio-visual means until the same date. The previous deadline for both was June 30. The ministry launched the databank on December 1 as a repository of existing and eligible independent directors to help companies connect with people who had the skills they were looking for. All existing independent directors were required to register themselves within three months of the notification. It also entailed a basic online proficiency self-assessment test starting in March 2020, which they would have to take within a year of registration. – Our Bureau

### IOC Reports ₹5,185-cr Loss in Q4 on Inventory Losses

NEW DELHI Indian Oil Corporation (IOC) reported a loss of ₹5,185 crore for the fourth quarter of 2019-20, hurt by a surge in inventory losses as oil prices collapsed suddenly. The company had made a profit of ₹6,099 crore a year ago. Revenue from operations fell 1.4% year-on-year to ₹1,39,619 crore in the quarter to March. Gross refining margin for the quarter was minus $9.64 per barrel compared to $4.09 per barrel a year earlier. The company incurred an inventory loss of ₹14,692 crore during the quarter compared with a gain of ₹1,787 crore in the year-ago period. – Our Bureau

# IMF Sees Covid-Hit India Contracting 4.5% in FY21

Had forecast 1.9% growth for India in April and 3% contraction for the world

Our Bureau

New Delhi: The International Monetary Fund (IMF) has projected a deeper 4.5% contraction for India in FY21 than earlier estimated, citing a longer lockdown period and slower than anticipated recovery.

In the June update – A Crisis Like No Other, An Uncertain Recovery – of its flagship World Economic Outlook (WEO), the IMF has forecast a -4.9% global growth in 2020, 1.9 percentage points below the April 2020 estimate.

The IMF had forecast a 1.9% growth for India in the April edition of the WEO and 3% contraction for the world.

"The Covid-19 pandemic has had a more negative impact on activity in the first half of 2020 than anticipated, and the recovery is projected to be more gradual than previously forecast," the IMF said, adding there were significant downside risks and there was a higher-than-usual degree of uncertainty around its forecast.

"India's economy is projected to contract by 4.5% following a longer period of lockdown and slower recovery than anticipated in April," the fund said.

The latest assessment has also toned down the bounce back in FY22 to 6% against a stronger 7.4% growth forecast in April. In 2021, global growth is projected at 5.4%, marginally lower than 5.8% it expected in April.

### Downward Revision

IMF slashes India's growth forecast for FY21, 22

China only country to see positive growth at 1% in 2020

Global output down to -4.9% in 2020

All regions in world to see contraction for first time

| GDP FORECAST (%) | FY21 | FY22 |
| --- | --- | --- |
| IMF WEO (June) | -4.5 | 6 |
| IMF WEO (April) | 1.9 | 7.4 |
| World Bank | -3.2 | 3.1 |
| OECD | -3.7 | 7.9 |

### IndRa Projects -5.3% Growth

New Delhi: India will see its lowest growth in history at -5.3% in the current fiscal, according to India Ratings & Research (IndRa). This would be the sixth instance of contraction in India's GDP, occurring the last time about 40 years ago in 1979-80, it said in a report on Wednesday.

Further, the wash out of economic activity due to the pandemic was so quick and severe that GDP would contract in each quarter of FY21, the report said, before a modest 5.4% recovery in coming fiscal. – Our Bureau

# Transport Min Scraps Bulk Data Sharing Policy

Cites potential misuse of personal information & privacy issues to discard 2019 policy

Nishtha Saluja
@timesgroup.com

New Delhi: The transport ministry has decided to discard the bulk data sharing policy issued in 2019, citing potential misuse of personal information and privacy issues.

The policy allowed the ministry to share the Vahan database, which contains details of registered vehicles and driving licenses in the country.

The decision was taken in a recent meeting between officials of the ministry of road transport and highways, the National Informatics Centre and the ministry of home affairs, among others.

"There is a shift in the policy of this ministry to publish reports specific to industry or stakeholders requirements, and further that there are issues in sharing of the personal information. It was unanimously decided that the bulk data sharing policy and procedure should be scrapped," said the minutes of the meeting, reviewed by ET.

Instead of sharing bulk vehicular data with any company on a cost basis, which had been the established norm until now, reports generated on analysis of the data will be made available to stakeholders or the public.

Now, reports generated on analysis of data will be given to stakeholders

Sharing of vehicular data will now be done on the basis of the Personal Data Protection Bill, 2019, which is under consideration in the Parliament.

According to the policy, data is shared with automobile industry, banks, besides law enforcement agencies, at specified rates for each data set.

# Five More Sectors may Get Output-Linked Incentives

Scheme to help boost local mfg, create jobs, cut dependence on imports

Yogima.Sharma@timesgroup.com

New Delhi: India plans to expand its production-linked incentive scheme to five more sectors to help boost local manufacturing, reduce dependence on imports and create employment in the country.

Textile, food processing, battery manufacturing, auto components and network products are proposed to be covered under this programme where the total incentives could be as high as ₹50,000 crore, top government officials said.

The government had earlier this year announced similar schemes for the manufacturing of electronics products and pharmaceutical raw material.

The Niti Aayog has identified the sectors and deliberations are ongoing with the stakeholder ministries to provide fiscal support to the top manufacturers to help them scale up production, generate global markets and create employment, the officials said.

The government expects the incentives would help attract investments and make India emerge as a strong alternative to China.

While this has been the vision of the government under its Make in India programme, the drive under the incentive scheme has been accelerated following Prime Minister Narendra Modi's call for an Atmanirbhar, or self-reliant, Bharat.

"A sector-wise policy may be put up soon," one of the officials said.

The details of the fiscal support to each sector is still being finalised. It is estimated that the overall support across the five sectors could be up to ₹50,000 crore.

The share of incentive will depend on the pricing differential between India and competing nations, officials said.

The incentives could be for a five-year period from a base year and pegged to production growth.

The government had in April approved a ₹50,000-crore production-linked incentive scheme for electronic manufacturing.

Under this, incentive of 4-6% will be given to companies on incremental sales of goods manufactured in India for a period of five years.

### Expanding Reach

Scheme proposed to be extended to:

Textiles, food processing, auto components, battery mfg & network products

India has core competence in these sectors

Fiscal incentives worth ₹50,000 cr likely on incremental production

HOW WILL IT HELP?

Attract investments in India | Help draw firms from China | Help them generate global markets

Create big players in India

INVESTMENT PUSH

The government expects the incentives would help attract investments and make India emerge as a strong alternative to China

# Govt Extends I-T Return Filing Deadline to November 30

Extensions to give relief to taxpayers for making compliances: CBDT

Our Bureau

New Delhi: The government Wednesday provided further relief to taxpayers by extending statutory and regulatory compliance deadlines under the Income Tax Act, which were set to expire by June-end.

Extensions ranging between one month and three months have been granted for filing of income tax returns, audit reports, making investments in savings instruments under income tax, issuing of Form 16 by companies to employees besides issuing notices or orders by authorities under various direct taxes and the Benami Law. Deadline for linking PAN with Aadhaar has also been extended by three months.

The extensions have been granted "in order to provide further relief to the taxpayers for making various compliances", the Central Board of Direct Taxes (CBDT) said in a notification dated June 24.

The extension will reduce hardship of taxpayers, on one hand, and will also give some more breathing time to tax officers, said experts, amid challenges faced by taxpayers in meeting the statutory and regulatory compliance requirements across sectors due to the outbreak of Covid-19.

Original as well as revised income-tax (I-T) returns for the FY2019-20 or assessment year 2020-21 can now be filed till November 30, since the due date for I-T returns for the FY20 or assessment year 2020-21 has been extended to November 30, 2020. Therefore, tax audit report can be furnished by October 31, 2020.

The extension will reduce hardship of taxpayers and will also give some more breathing time to tax officers

Self-assessment tax with liability up to ₹1 lakh can be paid till November 30, but no extension has been granted to those having liability of over ₹1 lakh, and delayed payment would attract the applicable rate of interest.

Returns of income required to be filed by July 31, and October 31, 2020 ...

Taxpayers can make investments in various savings instruments such as National Savings Certificate, Public Provident Fund, National Pension Scheme, mediclaim insurance schemes and donations for income tax rebate for FY20, till July 31. The earlier deadline was June 30.

Investment in savings instruments or investments for roll over benefit of capital gains under the Income Tax Act, has been extended by three months till September 30, thus making them eligible for claiming deductions from capital gains in the same time frame. The earlier deadline was June 30.

The date for commencement of operation for the SEZ units for claiming tax holiday has been extended to September 30, 2020 for the units which received necessary approval by March 31, 2020.

"The government realises business need more time to get back to normalcy. Even tax offices are not working at their full strength and they may also need additional time to complete the assessments and other proceedings," said Shailesh Kumar, partner, Nangia & Co LLP.

# Customs Duty on Solar Imports to Help Local Industry

Kavya.Chandrasekaran
@timesgroup.com

Bengaluru: The government's move to promote indigenous equipment and impose customs duty on imports from August will help local industry develop but it will take up to two years to have an impact while ongoing projects that depend on foreign equipment may face hurdles, said industry executives and experts.

They were reacting to power and renewable energy minister RK Singh's announcement of a series of measures for the renewable energy sector on Tuesday, including prior approval for essential imports and incentives for projects that use local equipment.

Policy measures to build self-reliance and safeguard supply security would be beneficial in the medium to long term, said Sujoy Ghosh, country head, First Solar India, a leading manufacturer of solar panels. "Given the scale of its solar programme and the need for supply security, India needs to evaluate alternatives to lower its current dependency on one particular country," he said.

Since India is the third biggest solar market in the world, investments will surely follow but not immediately, said an industry executive. "In absence of tariffs, nobody would have invested in the supply chain in India because the Chinese will keep dumping. But it will take us a month before credible alternatives get built," said the executive, speaking on condition of anonymity.

Another solar developer expressed concern over the consequences basic customs duty will have on projects that are in the process of being commissioned.
